KHANH C. TRAN
PRIMARY EXAMINER

1. The Amendment filed on 08/30/2007 has been entered. Claims 1-33 are still pending in this Office action.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Regarding claim 4, in line 5, "propagation paths" has been changed to -- propagation path --.

Regarding claim 12, in line 4, "a processing" has been changed to -- a processing --; in line 7, "25" has been changed deleted; in line 9, "applied" has been changed to -- applying --.

Regarding claim 15, in line 5, "propagation paths" has been changed to -- propagation path --.

Regarding claim 25, in line 2, "processing applied" has been changed to --
processing applying --.

Regarding claim 26, in line 5, "propagation paths" has been changed to --
propagation path --.

Response to Arguments

3. Applicant's arguments, see Applicants' Remarks, filed on 08/30/2007, with respect to claims 1-3, 5, 7-9, 11-14, 16, 18-20 and 22-33 have been fully considered and are persuasive. The rejection of claims 1-3, 5, 7-9, 11-14, 16, 18-20 and 22-33 has been withdrawn.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

4. The present invention is directed to a method of signal processing for a spread spectrum digital radio communication receiver . Each independent claim identifies the uniquely distinct features "evaluation of a parameter of reliability of the calculated estimate" and "when the reliability parameter evaluated does not satisfy a confidence criterion, calculation of a refined estimate of the symbol by taking into account at least one additional propagation path from the sending means in the

processing applied to the radio signal received". The closest prior art of record, Cox et al. discloses an adaptive wireless communication receiver and Guilloard et al. US Patent Application Publication No. 2005/0063496 A1 discloses a method of selecting a receiving path and receiving device comprising several receiving paths, either singularly or in combination, fail to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
